

Sonu Kumar

Software Engineer — Java 17/21, Spring Boot, Microservices, AWS & RESTful APIs

📞 +91 7294085931 ✉ 231fa04053@gmail.com 🌐 github.com/cws31 🔗 linkedin.com/in/sonu-kumar

Technical Skills

Languages & Frameworks: Java (17/21), Spring Boot, Spring MVC, Spring Security, React, JavaScript, RESTful Web Services

Data Access & Databases: Spring Data JPA, Hibernate ORM, SQL (PostgreSQL, MySQL, Oracle, SQL Server), Relational Schema Design

Cloud & DevOps Tools: AWS (EC2, Lambda, API Gateway, RDS, S3), Docker, Git, GitLab, Jenkins CI/CD Pipelines, Maven, Postman

Testing & Observability: JUnit 5, Mockito, WireMock/Karate, Component Testing, Logging & Metrics (Elastic/Kibana), Swagger/OpenAPI

Core Methodologies: Microservices Architecture, Agile/Scrum, Secure Coding & RBAC, Data Structures & Algorithms (DSA), OOP

Projects

Scalable Workout Tracker Microservices REST API | [GitHub](#)

Mar – Apr 2026

- Designed and shipped **15+ REST API endpoints** on **Java 21** and **Spring Boot**, structured as isolated microservices to keep core business logic independently deployable and scalable.
- Secured every endpoint by wiring **Spring Security** to stateless **JWT** authentication and Role-Based Access Control (RBAC), preventing unauthorized data access across services.
- Drove code quality up by writing unit and component test suites with **JUnit 5, Mockito, and WireMock**, pushing automated coverage past **70%** and catching regressions before deployment.
- Containerized the stack with **Docker** and scripted a **CI/CD pipeline** that automated build, test, and deployment, cutting manual release effort.
- Tech Stack:** Java 21, Spring Boot, Spring Security, Spring Data JPA, MySQL, AWS (EC2, S3), Docker, JUnit 5, Mockito, Maven, Swagger.

Smart Habit Tracker Full-Stack System | [GitHub](#)

Sep – Oct 2025

- Delivered a full-stack habit-tracking platform, pairing a **Spring Boot** backend with a **React/JavaScript** frontend, built and released in two-week **Agile/Scrum** sprints.
- Wrote custom analytics logic to compute daily activity metrics and streak calculations in real time, keeping response latency low even as user data grew.
- Instrumented the service with **Elastic/Kibana** logging to surface system events, monitor performance, and cut API-error debugging time.
- Enforced secure coding practices and ran peer code reviews via **GitLab/Git**, closing security gaps before merge.
- Tech Stack:** Java 17, Spring Boot, React, JavaScript, Tailwind CSS, REST APIs, JWT, PostgreSQL, GitLab, Agile.

TaskSwap High-Performance Backend Service | [GitHub](#)

Nov – Dec 2025

- Built a modular Controller-Service-Repository backend in **Java** and **Spring Data JPA**, keeping business logic, data access, and API layers cleanly separated for maintainability.
- Modeled a relational schema on **PostgreSQL/Oracle** with proper indexing, transaction isolation, and foreign key constraints to guarantee data integrity under concurrent access.
- Profiled and rewrote slow queries and execution paths, cutting average API response time by **25%**.
- Set up **AWS API Gateway** routing and load-tested a simulated cloud deployment to validate high availability under traffic spikes.
- Tech Stack:** Java 17, Spring Boot, Spring Security, PostgreSQL, AWS API Gateway, Hibernate, Maven, Postman.

Education

Vignan's Foundation For Science Technology and Research

Bachelor of Technology in Computer Science and Engineering (CGPA: 7.72)

Expected Aug 2027

Vadlamudi, Andhra Pradesh

Maharani Janki Kunwar (MJK) College

Higher Secondary / Intermediate Science (Percentage: 83.8%)

Mar 2020 – Feb 2022

West Champaran, Bettiah, Bihar

Achievements & Problem Solving

- 1st Place Winner:** University VCode Hackathon (30+ teams) for building a secure, production-ready Spring Boot backend under time pressure.
- Consolation Prize:** HackStack Hackathon (ByteXL & Vignan University, 50+ teams) for a cross-functional software solution built with the team.
- Data Structures & Problem Solving:** Solved **60+ algorithmic challenges** on **LeetCode**, strengthening Java-based optimization and debugging skills.
- Verified Certifications:** Earned HackerRank credentials in **Java (Basic)** and **Problem Solving (Basic)**.
